BASE PERFORMANCE
SIMULATORS

BPS is one of the world's leading simulation companies. Based in the UK, their reputation has a global reach. With decades of experience developing cutting-edge simulators, the skills and expertise housed at BPS are unrivalled.

The team is led by factory Aston Martin driver and three-time Le Mans winner Darren Turner. Darren is a consultant to the Formula 1™ industry and has been developing simulators for over 23 years.

BLADE

BLADE

DESIGNED SPECIFICALLY FOR PRO-DRIVER
TRAINING, EDUCATION AND E-SPORTS

The Blade offers a complete driver training solution that is compact, easy to set up and e-sports ready. Launched in 2020, the Blade has proven to be a huge success, not only as an essential training tool that supports professional drivers around the world but also within the education sector, high-level Esports competition and motorsport research. Utilising the Base Performance Simulators team's wealth of experience in motorsport simulation, the Blade utilises state of the art components to ensure realistic and precise driver feedback.

With customisable extras such as V-box, D-Box movement and three pedal clutch system, the Blade can be tailored to allow for specific driver requirements and provides a genuine alternative to expensive testing and an effective addition to a drivers' development portfolio.
